

**Are you as safe
as you can be...
...working in the dark?**

Advanced Photoluminescent Technology[®]

Illuminating Safety Products

Go With The Glow

Doran Manufacturing has teamed up with LumAware™ to offer a wide range of illuminating safety products to improve the overall safety of working in low-light or no-light environments.

The Advanced Photoluminescent Technology[®] provides a bright and long-lasting glow that can be used on signage, tape, personal protective equipment and apparel to illuminate a path to safety, and improve the visibility of people and equipment.

Doran Manufacturing, LLC

Personal Protection Illuminating Safety Products Helmets, Helmet Bands, Custom Log Decals and Safety Vests

The illuminating power of the Advanced Photoluminescent Technology® can also be included in personal protection products such as helmets, helmet bands, customized logo decals, safety vests, and apparel. These products provide a bright and long lasting glow in low-light or no light environments and reflect light back to provide visibility and improve safety.

Interior Illuminating Safety Products For Buildings Adhesive Tape, Epoxy, & Signage

Most buildings have a back-up lighting plan that relies on the availability of a power source whether it is electric or battery powered.

Even the best backup lighting and emergency exit plans can fail when they are needed most, leaving people in complete darkness and uncertain of how to find the exit.

LumAware™ Advanced Photoluminescent Technology® illuminating safety products provide hours of glow to clearly show a path to safety. Tape, epoxy and signage products are “charged” when exposed to natural or manufactured light sources and emanate light when in darkness.

ESCAPE WAY

This Escape Way is shown in normal light and illuminated with Adhesive Tape and Customized Signage.

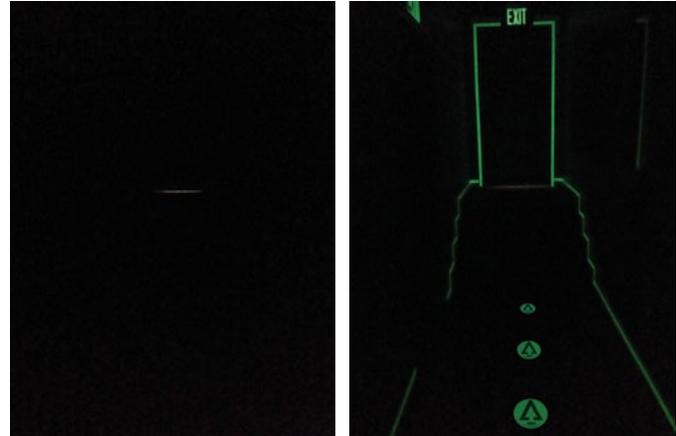

STAIRWELL

This Stairwell is equipped with Adhesive Tape on the handrails, window and door handle and Epoxy on the steps.

HALLWAY

This is a Hallway shown in the dark before and after installation of Adhesive Tape and Signage.

SAFETY SIGNS

Illuminating Safety Products for Vehicles Adhesive Tape & Decals

High visibility and reflective tape are a must in off-road equipment applications.

For equipment that is running in no-light or low-light conditions, installing LumAware™ Advanced Photoluminescent Technology® illuminating tape provides supplemental illumination and helps equipment to glow on all sides while improving overall safety for the operator and other workers at the job site.

Illuminating decals are also available to identify fire extinguishers and other critical items that need to be seen in the dark.
