Doran to demonstrate TPMS and telematics integrations at 2017 TMC Annual Meeting

Cincinnati, Ohio – Doran Manufacturing will be among the industry leaders in trucking maintenance technology at the upcoming 2017 TMC Annual Meeting & Transportation Technology Exhibition from February 27 – March 2 at Music City Center in Nashville, TN (Booth #1236)

Members of the Doran team will be available in Booth #1236 to discuss how implementing TPMS technology on both trucks and trailers can reduce tire related repair and maintenance costs fleets. In addition, demonstrations of the active integrations with telematics providers such as Omnitrac, Pedigree Technologies, PeopleNet and SafetyTrax will be also available in the booth. “The demand for fleets to gain remote access to tire pressures and low pressure alarms has significantly increased over the past few years, especially on trailer tires.” said Todd Thornicroft – National Sales Manager. “Fleets of all shapes and sizes have seen a true return on investment by implementing the Doran TPMS technology. Doran TPMS helps to maximize tire tread life, protect casings and allows fleets to proactively address tires which need to be inflated, repaired or replaced.”

About Doran Manufacturing, LLC: Cincinnati-based Doran Manufacturing has been creating solutions for 60 years including providing quality transportation safety since the early 1970s. In addition to tire pressure monitoring systems, the company supplies LED and incandescent Exterior Light Monitors, Sleeping Child Check® monitors, Emergency Exit Monitors and a full range of LED lighting products to the school bus market. Also, the company continues to manufacture customized electric terminals and terminal boards in the original factory that was established in 1953.
