Cincinnati, Ohio – Doran Manufacturing, LLC is pleased to announce the completion of our first 60 years in business. Doran has been creating customized solutions to solve our customers' problems since 1953, including providing reliable transportation safety products since the early 1970s.

In addition to providing tire pressure monitoring systems for truck fleets, mining/off-road vehicles, RVs, bus fleets & motorcycles, Doran produces LED/incandescent Exterior Light Monitors and Sleeping Child Check® monitors for the school bus market and continues to manufacture customized terminals & terminal boards in our original factory.

"Our owners' core values of **creating a great place to work and have a career** as well as **treating customer's problems as if they are our own** are long-term, embedded values lived by every individual in the company through decades of practice and good results." says Jim Samocki - General Manager.

Doran team members have daily opportunities to create new solutions and resolve challenges for customers due to the diversity and range of the company's products. Team members can be involved in building tooling for a custom brass electrical terminal, designing a new light monitor for a school bus company or completing integration projects with telematics provider partners to transfer TPMS data off the vehicle.

As a team and as individuals, we all feel good knowing that our customers are better off, with lower costs and safer operations, because they trusted Doran to provide solutions and products to them.

We, as a company, plan to be around for the next 60 years and beyond and we want our customers to be strong and prospering for at least the next 60 years as well.

**About Doran Manufacturing, LLC:** Cincinnati-based Doran Manufacturing has been creating solutions for 60 years including providing quality transportation safety since the early 1970s. In addition to tire pressure monitoring systems, the company supplies LED and incandescent Exterior Light Monitors, Sleeping Child Check® monitors, Emergency Exit Monitors and a full range of LED lighting products to the school bus market. Also, the company continues to manufacture customized electric terminals and terminal boards in the original factory that was established in 1953.
