Doran to demonstrate school bus safety products at NAPT Annual Summit

Cincinnati, Ohio- Doran Manufacturing will be displaying and demonstrating school bus safety products at the 41st National Association for Pupil Transportation Conference and Trade Show in Booth #107 on November 10 in Richmond, Virginia.

The school bus safety products offered by Doran Manufacturing enhance transportation safety and peace of mind. The Sleeping Child Check Monitor® alerts drivers to check the bus for sleeping children, Exterior Light Monitors reassure drivers that all lights are working properly, MN8 Foxfire™ illuminating signage light the way to safety in the event of an emergency, and the Doran 360™ Tire Pressure Monitoring Systems help avoid catastrophic tire failures.

“Doran has been designing and supplying products to help enhance the safety of children on school buses for many years.” said Jim Samocki – Vice President at Doran Manufacturing. “We provide products that range from showing drivers that the lights are functioning properly and the tires are inflated to the proper pressure from the driver’s seat to helping to avoid leaving a child on a bus and lighting the way to safety in an emergency with the MN8 FoxFire illuminating products. We look forward to providing demonstrations and interacting with school bus industry leaders at the NAPT Summit to discuss how our products can help improve the safety of their school buses.”

About Doran Manufacturing, LLC: Cincinnati-based Doran Manufacturing has been creating and building customized solutions for more than 60 years including providing quality transportation safety products since the early 1970s. The company produces LED and incandescent Exterior Light Monitors, Sleeping Child Check® monitors, Emergency Exit Monitors and a full range of LED lighting products to the school bus market. In addition, Doran provides tire pressure monitoring systems for truck fleets and off-road commercial equipment and also continues to manufacture customized electric terminals and terminal boards in the original factory that was established in 1953.
