

# Turn an idea into a reality

## Specializations:

- Terminals – Stamping
  - screw terminals, U-terminals, multiple bend and .250" male quick connect terminals
  - Materials: brass, tin-plated brass, aluminum, copper and tin-plated copper
- Automated Assembly Processes:
  - screw terminals, terminal boards, plastic housings
- Terminal boards and Fuse Panel Boards Production
  - Multiple process assembly
  - Board fabrication and identification
- Electronics Assembly

## Terminal Boards Electrical Connection Solutions

Custom, semi-custom, and off the shelf electrical connectors

We have internal capabilities to design, build and maintain tooling, stamping dies and automated equipment for custom, high-speed applications requiring up to 100-ton presses and we annually produce more than 10 million stamped terminals with additional capacity available for new business.

### Experienced in Customer Satisfaction

Doran collaborates with companies, on-site or in-house, to provide engineering expertise and cross-industry experience. Doran's engineers can take ideas or sketches and rapidly develop them into working prototypes and then into production parts. This helps customers meet project deadlines and bring new products to market quickly.
